

Kit includes : Base, stabilising foot, bungee pole set and top rail

Snap fit the stabilising foot into the grooves of the base

Secure the foot to the base using the allen key supplied

Assemble the bungee pole and insert into the base

Lean the bannerstand backwards and extend the banner by lifting the top rail until the complete image is visible

Secure the banner into position by locating the bungee pole groove into the top rail

Take care when lowering the banner to prevent damage to the graphic (do not drop)

Please refer to separate instruction sheet UI108 for attaching graphics to the bannerstand

### Technical Specification

Visible graphic area : 1985mm approx (H) x 800mm (W)  
Unit weight : 4.3kg approx

#### Note:

- 1, Add 100mm to the graphic height (at base end) to allow for the roller
- 2, Add 50mm to the graphic height (at rail end) to allow for rail fitting (i.e Overall graphic dimensions 2135mm high x 800mm wide)

### Guidelines for Graphic substrates

- 1, Material thickness must be between 250 and 300 microns in total
- 2, The substrate must be pliable and suitable for roller bannerstands
- 3, After fitting, the graphic should be left for 24 hours before use to ensure the adhesive bonds sufficiently
